10 Min	Closing remark

CONTEXT

The GREEN PURCHASING NETWORK-A Landscape of Practice to Achieve SCP with cases of 24 key elements provides an overview of how the green purchasing networks functions to achieve the SCP along with the four application of green purchasing networks in market, private, business and public level.

This publication helps to identify where the green purchasing networks are by knowing the progress they made, the challenge they face, the lesson they learnt; come to conclusion with six common characters which lay importance practice from the front-line practice, diversity embodied, Ecolabel served as market mechanism tool, criteria support public implementation, multi-approach in private sector, and circularity and innovation in business sector. Four recommendations are provided with synthesis on Ecolabelling scheme and green purchasing; advocate the accessibility of green products in private sector; proactive the innovation practice in business sector; and deepen the pilot effect of public green procurement.

The International Green Purchasing Network (IGPN) is a global multi-stakeholder partnership for green purchasing founded with its mission:(a) Promote globally the development of environmentally friendly products and services and Green Purchasing activities;(b) Share information and know-how on Green Purchasing and environmentally friendly products and services internationally;(c) Harmonize the efforts of Green Purchasing and the development of environmentally friendly products and services from a global viewpoint.

The International Green Purchasing Network (IGPN) was established in 2005 to promote Green Purchasing around the globe with all stakeholders, such as international organizations, businesses, governmental organizations, local authorities, and NGOs, who take the initiative in implementing Green Purchasing.

China Environmental United Certification Center (CEC) hosted the IGPN Secretariat since 2018. CEC approved by the Ministry of Ecology and Environment of the People's Republic of China (MEE), is a comprehensive certification and professional service institution leading in environmental protection, energy saving and low carbon areas. CEC engaged its activities in policy research and practice of China Environmental Labelling Program, Environmental Management Systems, Greenhouse Gas Validation and Verification, Verification of Carbon Emissions, Energy Savings Audits and Green Supply Chain Management, Green Public Procurement etc.
