- Release the <Green Purchasing Networks measurement methodology> and <Pilot testing report> are available
- Apply the Capacity building project on sustainable public procurement practices in Kazakhstan (on-going)

Output and Outcome

- the GPN measurement methodology development initiative was launched to advocate green purchasing practice, promote the SCP transition by using the IGPN's unique GPN model ubiquitously through **a measurable, reportable, and replicated measurement** methodology.
- Through the three batches soliciting suggestions with nearly 50 comments, plus pilot testing in 5 GPNs, the **measurement methodology and Questionnaire are available to evaluate the Green Purchasing Network performance.**

Steps for scale up the Green Purchasing Network according the GPN Methodology

2025 Opportunities

Central Asia
ASEAN Plus Three
One Planet Network
World Bank Group
Asia Development Bank

Joint project
for using GPN
methodology

Needs for
GPN
Methodology
application

GPN Model
Outreach for
labeled
products

Case study
Capacity building
Training activities

Scale up GPN model in
a new area

2025 Priorities

GPN methodology implementation

- Joint activity for monitoring SPP
- Joint research project for scaling up GPN model
- GPN methodology reporting preparation

Platform and network

- Regular meeting
- Members development
- Fulfill the IGPN's role for SDG 12

Collaborate to raise fund

- Joint project application;
- Explore the link with green finance approach
